Summary

Salesforce Product Owner, Senior Salesforce Administrator, and Business Systems Analyst with 4+ years of Salesforce experience and 9+ years of overall professional experience driving CRM strategy, platform optimization, and business transformation initiatives. I am a 4x Salesforce Certified professional with proven expertise in product roadmap ownership, backlog prioritization, stakeholder management, business analysis, Salesforce administration, and Agile delivery. I currently manage Salesforce products supporting 1,500+ users while leading cross-functional teams and delivering scalable automation solutions that improve operational efficiency, user adoption, and data quality. Key outcomes include reducing manual effort by 30%, achieving 99.5% data accuracy, reducing support tickets by 35%, and delivering business-focused CRM enhancements aligned with organizational objectives. My experience spans Salesforce governance, release management, UAT coordination, process improvement, change enablement, and CRM transformation programs. I am also exploring Agentforce capabilities and AI-driven automation to enhance user productivity and support operations. Core Strengths:- Salesforce Product Ownership, CRM Strategy & Governance- Requirements Gathering, Business Analysis & Solution Design- Process Automation (Flows, Validation Rules, Workflows)- Release Management, UAT & Change Management- Stakeholder Management, Training & User Adoption- Data Governance, Reporting & Analytics Certifications: Salesforce Certified Business Analyst | Salesforce Certified Administrator | Salesforce Certified Platform App Builder | Salesforce Certified Agentforce Specialist | Atlassian Jira Certification | Google Project Management Certificate

Experience

INTO University Partnerships

2 years 10 months

Salesforce Product Owner & Support Team Lead

April 2025 - Present (1 year 3 months)

Bangalore Urban

Lead a team of 7-10 Salesforce support professionals managing 300+ monthly cases while consistently achieving SLA targets and driving service excellence. Own the Salesforce product roadmap and backlog of 50+ user stories, partnering with 15+ business stakeholders to align CRM capabilities with organizational objectives.

Facilitate stakeholder workshops, requirements gathering sessions, backlog grooming, sprint planning, and release prioritization activities.

Design and implement automation solutions using Salesforce Flows, Validation Rules, and process improvements, reducing manual effort by 30%.

Improve data governance processes, increasing data accuracy to 99.5% across key business operations.

Lead change management initiatives, create SOPs, conduct user training, and improve adoption, reducing onboarding time by 25% and support tickets by 35%.

Support Salesforce release and deployment management across sandbox and production environments.

Evaluate Agentforce capabilities and AI-driven automation opportunities within Salesforce to enhance user productivity.

Manage user lifecycle processes, security model, permission management, and governance for 1,500+ Salesforce users.

Partner with senior leadership to define CRM enhancement priorities and coordinate UAT, release management, and post-release support.

Salesforce Administrator

September 2023 - April 2025 (1 year 8 months)

Bangalore Urban

Administered a Salesforce Sales Cloud environment supporting 500+ users while maintaining platform stability, security, and data quality.

Conducted requirements elicitation workshops and translated business needs into functional specifications, user stories, and solution designs.

Delivered 12+ Salesforce enhancements and process improvement initiatives through collaboration with business and technical teams.

Automated operational processes using Salesforce Flow Builder and Workflow Rules, reducing processing time by 30%.

Built executive dashboards and advanced reports providing real-time visibility into sales performance and operational KPIs.

Managed release cycles, sandbox testing, deployment planning, and change set migrations with zero business disruption.

Supported CRM governance, user adoption initiatives, and continuous improvement programs.

Developed and delivered user training and documentation programs, reducing support ticket volume by 35%.

Zensar Technologies

Salesforce Administrator

March 2021 - September 2023 (2 years 7 months)

Administered Salesforce Sales Cloud for 500+ users across multiple business units; maintained org health and ensured platform stability.

Configured and managed roles, profiles, permission sets, page layouts, record types, and object-level security controls.

Managed change and release processes including sandbox testing, change set deployments, and post-release validation with zero downtime.

Automated business processes using Flows and Workflow Rules, reducing average processing time by 30%.

Delivered data-driven insights through custom reports and dashboards supporting leadership decision-making across sales and operations.

Developed and delivered user training and documentation programs, reducing support ticket volume by 35% through proactive enablement.

Self Employed

Career Sabbatical & Professional Development

January 2017 - March 2021 (4 years 3 months)

Managed personal and family commitments while pursuing professional development and long-term career planning.

Transitioned into the Salesforce ecosystem through structured learning, certification preparation, and self-development initiatives.

Apollo Cradle | Fortis | Cytecure

Service Line Manager

2015 - 2017 (2 years)

Managed end-to-end operational workflows across patient scheduling, billing, and insurance processes in a high-volume healthcare environment.

Led operational reporting and compliance tracking; coordinated cross-functional teams across clinical and administrative functions.

Managed healthcare operations across multiple facilities, overseeing patient scheduling, billing processes, insurance coordination, and operational workflows.

Ensured compliance with healthcare regulations, quality standards, and organizational policies.

Identified and implemented process improvements that enhanced customer experience and operational effectiveness.

Led cross-functional collaboration between clinical and administrative teams to improve service delivery.
